#### **Topic:**

#### **Industrial Stormwater Monitoring - A Community Approach**

Stormwater can be a blessing or a curse depending on the situation. This workshop will explore a variety of methods that can be used by NGOs and community members to identify, document, and report stormwater pollution from industrial facilities. The topics covered will include:

- Identifying industrial sites
- Monitoring methods including sample collection, photography and visual observation.
- Reporting the data collected to local and state agencies
- Litigation options

#### **Presenter:**

**Ray Hiemstra, Associate Director of Programs at Orange County Coastkeeper.** Ray has 20 years of experience in stormwater monitoring and leads the highly successful Industrial stormwater monitoring program at Orange County Coastkeeper. His work also includes water quality advocacy, policy development, grant writing, Marine Protected Areas, species and habitat restoration and water and sediment monitoring. Ray is a member of numerous committees and workgroups including the California Water Monitoring Council, Port of LA/Long Beach Harbor Safety Committee and Newport Bay Management Committee.
