

Fishing California's Sacramento Valley - Central Sierra Region

*California
Department of Fish and Game*

California Department of Fish and Game

The mission of the Department of Fish and Game is to manage California's diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment by the public.

This program is supported, in part, through a special Federal Excise tax on the sales of fishing tackle and motor boat fuel to improve your fishing and boating opportunities.

This program receives financial assistance through the federal aid in Sport Fish and/or Wildlife Restoration Act. The U.S. Department of the Interior prohibits discrimination on the basis of race, color, national origin, age, sex, or disability. If you believe you have been discriminated against in any program, activity, or facility as described above, or if you desire further information please write to:

Adverse circumstances, such as poor weather, water or road conditions, may cause the planting schedule to change. Stocking of waters is subject to change because of fisheries management needs.

Fishing in the City

“Fishing in the City” is a fishing education and conservation awareness program that serves urban areas in Southern California, the San Francisco Bay Area, Fresno, and in the Sacramento region. Through the following services “Fishing in the City” promotes responsible fishing by making fishing convenient, easy to learn, safe and affordable.

- In partnership with local parks and community organizations, “Fishing in the City” stocks select urban ponds with trout in the winter and catfish in the summer to enhance fishing opportunities for urban citizens. Anglers find more time and opportunities to fish if they can fish close to home.
- “Fishing in the City” cosponsors fishing instruction clinics so that beginning anglers can get the training they need to give this rewarding sport a try. The clinics also encourage participants to be responsible anglers who support the conservation of fish habitat and water quality.
- Those who do not have fishing equipment can borrow a rod at fishing clinics or at designated rod loan sites around town.
- In metropolitan Sacramento, “Fishing in the City” regularly stocks fish at Southside Park, William Land Park, Gibson Ranch, Howe Park, Elk Grove Park, North Laguna Park, Hagan Park and Mather Lake. Fish are also planted at Oak Grove Regional County Park in Stockton. (In addition, American River Fish Hatchery also stocks rainbow trout throughout the rest of the region).

Trout Management

Providing diverse fishing opportunities

Trout are California's primary and most widespread fishery resource. They occur in over 18,000 miles of the state's cooler streams and are the principal sport fish in 3,581 cold water lakes and reservoirs. Trout angling is the most popular type of angling in California, representing about 60 percent of freshwater angling efforts statewide. In contrast, the second most popular fishing is for black bass, which accounts for about 12 percent of the statewide angling demand. Economically, trout fishing in California generates an estimated \$3 billion in personal income, accounting for 92,400 jobs.

The California Department of Fish and Game is responsible for managing the state's trout resources and providing a diversity of angling opportunities. Efforts are underway to review current trout management strategies and to plan for the future. All resident trout and inland salmon management strategies and programs will be coordinated under one encompassing strategic trout management plan. The strategic plan will provide direction and goals to meet increasing resource demands, diverse angler desires, and future demographic changes.

Inland Trout Program

Presently, trout are managed under five types of fishery management strategies:

1. Put-and-Take Fisheries

This management technique is employed in waters that are easily reached by the public and where angling demand is high. It is supported chiefly by hatchery-produced trout weighing about one-half pound each and measuring about 12 inches in length. These fish are planted in about 780 (4 percent) of the 18,000 stream miles and about 300 (8 percent) of the 3,581 cold water lakes and reservoirs suitable for resident trout in California. At

least 50 percent of planted “catchable-size” trouts are expected to be caught by anglers shortly after stocking. These fisheries provide good quality family-type fishing opportunities in easily accessible areas where anglers have a high expectation of harvesting some fish. As an added bonus for anglers, hatchery-produced trophy-size trouts (larger than 2 pounds each) are released in limited quantities into selected waters.

2. Put-and-Grow Fisheries

These fisheries are supported by hatchery-produced trout stocked at 3 to 8 inches in length. This strategy is used in waters where spawning habitat is limited but fish habitat otherwise provides for suitable trout growth and survival. Many of these fish are expected to survive for more than one season thereby providing trophy-size fish in subsequent years. This management technique is used for aerial stocking of over 700 high mountain lakes, and for inland (non-anadromous) salmon fisheries.

3. Wild Trout Managed Fisheries

Management guidelines for wild trout waters are contained in policies established by the California Fish and Game Commission. These guidelines state that, “designated wild trout waters should provide a quality experience by providing the angler with an opportunity to fish in aesthetically pleasing and environmentally productive waters with trout populations whose numbers or sizes are largely unaffected by the angling process.” Hatchery produced strains of wild or semi-wild trout may be used to supplement populations, if necessary, but no domesticated strains of catchable-size trout are allowed. Designated wild trout waters are managed principally by protecting, maintaining, and rehabilitating habitat, and adopting appropriate angling regulations. Presently, over 600 miles of stream throughout the state and three lakes comprising 81 surface acres are managed as designated wild trout waters.

4. Catch-and-Release Fisheries

This strategy is employed in waters where trout production and fishing quality are improved by limiting harvest. California practices a modified form of catch-and-release management that

encourages a zero harvest of trout in designated catch-and-release waters. However, regulations allow for a daily bag limit of one or two trout in many of these waters. Gear is often restricted to artificial lures with barbless hooks to enhance survival of released fish. Catch-and-release is often employed as a management tool in put-and-grow and wild trout managed fisheries. Presently, over 45 stream segments totaling over 400 miles, and 13 lakes comprising over 7,000 surface acres are specifically managed as designated catch-and-release waters. Additional waters are added each year.

5. Threatened Native Trout Management

The primary objective of this program is to protect or restore the state's native species of trout. Several species of native trout, including Little Kern Golden, Lahontan Cutthroat, Pauite Cutthroat and several strains of steelhead are listed as threatened while others are considered unique or species of special concern. One native species, the bull trout, no longer exists in California. Restoration efforts often involve managing small, remnant populations and, when necessary, establishing or relocating populations. A few native populations are managed by the Wild Trout Program or regulated with catch-and-release regulations. The Heritage Trout Program has been established to increase the public's awareness of native trout species and to identify angling opportunities in waters where healthy native populations exist.

Hatchery System

Providing fish for California anglers

Fourteen trout hatcheries or facilities throughout the state produce over 16 million trout weighing, in total, slightly over 4 million pounds. Most of the poundage consists of 8 million catchable-size trout for put-and-take fisheries. The remaining fish produced consist of trout for put-and-grow managed fisheries.

The annual budget for the trout hatchery program is about \$7 million including employment of 95 permanent personnel. The newest facility was completed in 1968 (American River Hatchery in Sacramento County) and the oldest is over 100 years old (Mt. Shasta Hatchery in Siskiyou County).

Trout are stocked in streams, lakes and reservoirs using specialized trucks and a specially-equipped airplane. Frequency of stocking varies from weekly, monthly, annually, or every few years depending on angler demand or management strategy.

Warmwater Fish

Some of the listings on these pages refer to warmwater fish. These include any of the following gamefish:

largemouth bass

catfish

sunfish (bluegill, redear sunfish, pumpkinseed)

CalTIP

Californians Turn in Poachers and Polluters 1 (888) DFG-CALTIP

CalTIP is a confidential secret witness program that encourages the public to provide DFG with factual information leading to the arrest of poachers and polluters. The toll free number operates 24 hours a day, 7 days a week. Callers may remain anonymous, and may be eligible for a cash reward if his/her information leads to a citation or an arrest.

Pollution – Incidents of industrial and agricultural pollution as well as the dumping of household waste can devastate fish, wildlife, and habitat. To combat polluting, report these acts.

Poaching – Poaching is the illegal taking of fish and wildlife and can involve hunting out of season, the taking of more fish or game animals than the law allows, and the killing of protected wildlife. Equally devastating crimes against wildlife include the illegal collection of native reptiles for commercial trade, the illegal collection of duck and goose eggs from the state’s marshlands, and the illegal practice of transporting and introducing non-native, undesirable fish (like northern pike and white bass) into California’s lakes and rivers.

To Report a Poacher or Polluter

If you witness a poaching or polluting incident or any fish and wildlife violation, or have information about such a violation, call CalTIP. Be prepared to give the fullest possible account of the incident including the name, address, age and description of the suspect, vehicle description, direction of travel, license number, type of violations and when and where it occurred. Your identity will be protected.

A warden or dispatcher will take your call. Information from the call is relayed to the Fish and Game region where the offense occurred and an investigation is undertaken locally. If the information supplied by the caller results in an arrest, the caller becomes eligible for a reward. (Rewards of up to \$1,000 have been paid.) All reward money is acquired through private donations; no state funds are used. The case is reviewed by a volunteer citizen’s group known as the “CalTIP Citizens Review Board.”

Fishing in the Sacramento Valley - Central Sierra

This summary of freshwater fishing opportunities in the 17 counties which constitute the Department of Fish and Game's Sacramento Valley Central Sierra Region, and covers the major waters where fish are usually present and anglers are welcome.

Anglers are reminded that fishing situations are dependent upon weather, water conditions, and other factors which change from day-to-day. For up-to-the-minute information on specific areas, should check with local sources, such as tackle retailers, concessionaires, and Chambers of Commerce or call the Department of Fish and Game numbers listed on page 2.

Everyone 16 years of age and over must have a valid fishing license to fish in California's inland waters. Licenses and regulation booklets may be obtained at most sporting goods stores, bait shops, and at all DFG offices. ***Be sure to read the current regulations before you fish, because they are subject to change from year to year.***

This symbol means the water is planted

by the Department of Fish and Game.

ALPINE COUNTY

Lakes and Reservoirs

Blue Lakes (Upper and Lower) - Elevation 8,000 ft. 198-344 acres.

Access from Hwy 88. 25 miles west of junction with Hwy 89. 12 miles to Lower Blue Lake. Small Boats only.

Info: P.G.andE. Division Land Supervisor, Stockton.

Services/Facilities: Hwy 88/89 in Hope Valley.

Species: Rainbow and Cutthroat Trout in Upper Lake.

Burnside Lake - Elevation 7,500 ft. 7 acres.

Access from junction of Hwy 88 and 89 via dirt road south 5.5 miles to lake.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Hwy 88/89 in Hope Valley. Small RV access at lake, restroom and tent camp.

Species: Rainbow and Brook Trout.

Caples Lake - Elevation 7,800 ft. 620 acres.

Located approximately 15 miles west of junction Hwy's 88/89 on Hwy 88.

Info: Amador Ranger Station, Pioneer, CA.

Services/Facilities: Bait and Tackle, store, resort, RV sites, tent sites.

Species: Rainbow, Lake, Brown and Brook Trout.

Indian Creek Reservoir - Elevation 5,600 ft. 160 acres.

Access from Hwy 89 via Airport Rd, 4 miles south of Woodfords. 3.6 miles from Hwy 89 to lake.

Info: BLM, Carson City, NV.

Services/Facilities: Campground with RV sites. Woodfords and Markleyville.

Species: Rainbow, Cutthroat, Brook and Kamloops Trout.

Kinney Reservoir - Elevation 8,317 ft. 33 acres.

Located ½ mile east of Ebbetts Pass on Hwy 4. Limited parking with trail to lake shore.

Info: Amador Ranger Station, Pioneer, CA.

Services/Facilities: Campgrounds 4 miles east and 2 miles west on Highland Lakes Rd.

Species: Rainbow Trout.

Lake Alpine - Elevation 7,320 ft. 179 acres.

Located 51 miles east on Angels Camp on Hwy 4.

Info: USFS, Hathaway Pines, CA.

Services/Facilities: Marina, boat rental, RV and tent sites, picnic area with barrier-free access, store and lodge.

Species: Rainbow trout and catfish.

Mosquito Lakes (Upper and Lower) - Elevation 8,000 ft. 4 acres each.

Located 54 miles east of Angels Camp on Hwy 4.

Info: Calaveras Recreation District, Hathaway Pines, CA.

Services/Facilities: Primitive campsites with toilets.

Species: Rainbow Trout.

Red Lake - Elevation 8,000 ft. 85 acres.

Located 6.5 miles west of Hwy's 88/89 near Hope Valley.

Access on Hwy near dam.

Info: Amador Ranger Station, Pioneer, CA.

Services/Facilities: Hwy 88/89 in Hope Valley.

Species: Rainbow, Brook and Cutthroat Trout.

Union Reservoir - Elevation 6,880 ft. 197 acres.

Info: Calaveras Recreation District, Hathaway Pines, CA.

Services/Facilities: Telephone, family and group camps just beyond reservoir at Spicer Reservoir.

Species: Rainbow Trout.

Woods Lake - Elevation 8,000 ft. 16 acres.

Access to lake via Woods Lake Rd. from Hwy 88, 10.5 miles west of junction Hwy 88/89 in Hope Valley. 2 miles to lake from Hwy 88. No outboard motors.

Info: Amador Ranger Station, Pioneer, CA.

Services/Facilities: Gravel launch for small boats, barrier-free campsites and restrooms, RV sites.

Rivers and Streams

Carson River (West Fork) - Elevation 7,000 ft. 8 mile reach.

From junction of Hwy's 88/89 (1) go downstream to Woodfords, or (2) upstream through Hope Valley, using the Blue Lakes Rd. to access the upper reaches.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Bait and Tackle, store, propane, resort in east end of Hope Valley or in Woodfords.

Species: Rainbow and Cutthroat Trout.

Carson River (East Fork - Upper) - Elevation 6,000 - 7,000 ft. 17 mile reach.

Designated wild trout water. (Wolf Creek to Carson Falls) No special regulations.

Access from Hwy 4 via Wolf Creek Rd, 2.5 miles to the mouth of Wolf Creek. Hike upstream from there.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: RV sites at Hwy, primitive campsites.

Species: Brown, Rainbow Trout, and Mountain Whitefish.

Carson River (East Fork) - Elevation 5,500 ft. 6 mile reach.

Access points along Hwy 89 beginning at Hangmans Bridge, 8 miles south of Woodfords.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Bait and tackle, store, propane, resort, RV sites.

Species: Rainbow and Cutthroat Trout.

Carson River (East Fork - Lower) - Elevation 5,000 - 5,500 ft. 11 mile reach.

Access from Hangmans Bridge 8 miles south of Woodfords on Hwy 89. Park near bridge, use trail on Jeep road behind locked gate on downstream side of Hwy. Other access trail off road to Indian Creek Reservoir.

Designated wild trout water, check regulations. (Hangmans Bridge to state line).

Info: Alpine Co. Chamber of Commerce and Forest Service Info

Center, Markleeville

Services/Facilities: Markleyville and Woodfords.

Species: Rainbow, Brown, and Cutthroat Trout, Mountain Whitefish. Wild Trout Stream.

Markleeville Creek - Elevation 5,500 ft. 1.5 mile reach.

Stream flows through Markleyville and downstream along Hwy 89.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Bait and Tackle, store, propane, RV sites.

Species: Rainbow and Cutthroat Trout.

Mokelumne River (North Fork) - Elevation 7,000 ft. 2 mile reach.

Access 2 mile stretch between Hermit Valley Crossing and Highland Lakes Rd. 58-60 miles east of Angels Camp on Hwy 4.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Toilets at Bloomfield campground on Highland Lakes Rd, Primitive campsites along Hwy 4.

Species: Rainbow Trout

Silver Creek - Elevation 6,000 ft., 1.5 mile reach.

Access from Centerville campground near Wolf Creek, off Hwy 4, 2.5 miles from junction Hwy 89 and Hwy 4.

Info: Alpine Co. Chamber of Commerce and Forest Service Info Center, Markleeville

Services/Facilities: Primitive campsites.

Species: Rainbow Trout.

AMADOR COUNTY

Lakes and Reservoirs

Bear River Reservoir (lower) – Elevation 5,800 ft. 746 acres.

Access from Hwy 88, 47 miles east of Jackson via USFS Rd. 8N03. 2 miles to lake.

Info: Lumberyard Ranger Station, Pioneer, CA.

Services/Facilities: Marina, bait and tackle, propane, store, resort,

primitive camp sites, RV sites with hookups. Barrier-free access at resort.

Species: Rainbow and Brown Trout.

Lake Amador – Elevation 485 ft. 425 acres.

Access from Hwy 88, 3 miles from town of Ione. Use Jackson Valley Rd., approximately 5 miles to entrance near dam.

Info: Lake Amador Resort, Ione, CA. *Privately Stocked.*

Services/Facilities: Bait and tackle, store, tent and RV camping, showers, disposal.

Species: Largemouth Black Bass, Rainbow Trout, Catfish, Bluegill, Crappie, and Perch.

Salt Springs Reservoir – Elevation 3,700 ft. 961 acres.

Access from Hwy 88, 5 miles east of Ham's Station via Ellis Rd. 12 miles to dam.

Info: Amador Ranger District, Pioneer, CA.

Services/Facilities: Primitive tent and RV camping, primitive launch access. Improved camping closer to Hwy 88.

Species: Rainbow, Brown and Brook Trout.

Silver Lake – Elevation 7,200 ft. 525 acres.

Located 50 miles east of Jackson on Hwy 88.

Info: USFS Placerville, CA. Kit Carson Lodge or Kay's Silver Lake Resort at Silver Lake.

Services/Facilities: Lodge and resort, stores, bait and tackle, gas and propane, RV sites.

Species: Rainbow, Brown, Brook Trout.

Tabaud Reservoir – Elevation 1,400 ft. 44 acres.

Use Hwy 49 south from Jackson, 5 miles to Clinton Road, then 6 miles to lake.

Management: PGE, Info: Department of Fish and Game (SVCSR), Rancho Cordova

Services/Facilities: Day use only. Picnic area with Restrooms.

Species: Rainbow Trout.

Tiger Creek Afterbay – Elevation 2,300 ft. 70 acres.

Use Hwy 88 east from Jackson 14.5 miles to Buckhorn Rd, 3 miles to lake.

Management: PGE, Info: Department of Fish and Game (SVCSR), Rancho Cordova

Services/Facilities: Pioneer (4 miles). Day use only.
Species: Rainbow Trout.

Rivers and Streams

Mokelumne River – Elevation 800 – 1,000 ft. 3 mile reach.

Access from Hwy 49, 6 miles south of Jackson via Electra Rd, then 2 miles east to fishing area.

Management: PGE

Info: Department of Fish and Game (SVCSR), Rancho Cordova

Services/Facilities: Mokelumne Hill (4 miles)

Species: Rainbow and Brown Trout. Kokanee in fall.

BUTTE COUNTY

Lakes and Reservoirs

DeSabra Reservoir - Elevation 2,700 ft. 15 acres.

This reservoir is 9.5 miles north of Paradise on Skyway. Day use fishing on south and east sides.

Info: Almanor Ranger District, Chester on P.G.andE. Land programs offices, Chico.

Services/Facilities: Paradise

Species: Rainbow Trout

Oroville Reservoir - Elevation 900 ft. 15,800 acres.

Access via Oro Dam Blvd. from Oroville on Hwy 70 to dam 5 miles east of city.

Info: California State Parks and Recreation, Area manager, Oroville.

Services/Facilities: Marina with launch ramps, camping, RV sites, visitor center, bait and tackle, store, propane.

Species: Largemouth, Smallmouth, and Spotted Bass, Brown Trout, Chinook Salmon, Crappie, Sunfish, and Catfish.

Paradise Reservoir - Elevation 2,543 ft. 165 acres.

From Paradise, travel 5 miles on Skyway to Magalia. Use Coutolenc Rd, 3.5 miles to park entrance at lake. A drinking water lake, no outboard motors or live bait; fee area.

Services/Facilities: Picnic area.

Species: Rainbow and Brown Trout, Largemouth Bass, Catfish, and Bluegill.

Thermolito Forebay - Elevation 226 ft. 600 acres.

Two access points from Hwy 70 north of Oroville. (1) Use Grand Ave. 1 mile from Oroville to South State Recreation Area. (2) Use Grand Drive 3 miles from Oroville to North State Recreation Area.

Info: California State Parks and Recreation, Area manager, Oroville.

Services/Facilities: Gravel boat launch, barrier-free access at north end, restroom.

Species: Rainbow and Brown Trout, Largemouth Bass, Catfish, and Sunfish.

Rivers and Streams

Butte Creek - Elevation 3,000 ft. 3 mile reach.

Approximately 30 miles northeast of Chico. Use Hwy 32 to Butte Meadows exit. Follow Humboldt Rd. to Butte Meadows.

Services/Facilities: RV sites, primitive campsites, store, bait and tackle, propane.

Species: Rainbow Trout.

CALAVERAS COUNTY

Lakes and Reservoirs

Comanche Reservoir – Elevation 235 ft. 7,700 acres.

Located between Hwy 88 and Hwy 12 near the town of Clements. Use Comanche Parkway for north shore access, 5 miles north of Clements off Hwy 88, OR south shore access 6 miles east of Clements off Hwy 12.

Info: Comanche North shore Resort or South Comanche shore.

Services/Facilities: Tent and RV campsites with full hookups, full service marinas, rentals.

Species: Rainbow Trout, Largemouth Bass, Bluegill, Crappie, Catfish, and Kokanee.

New Hogan Reservoir – Elevation 713 ft. 4000 acres.

Access from Hwy 26 via Hogan Dam Rd, .5 miles south of junction Hwy 12 and Hwy 26 at Valley Springs.

Info: US Army Corps of Engineers, New Hogan Lake.

Services/Facilities: Tent and RV sites, full service marina, launch ramps, rentals, store, bait and tackle, showers and disposal.

Species: Rainbow Trout, Largemouth Bass, Striped Bass, Catfish, Bluegill, and Crappie.

New Melones Reservoir – Elevation 1088 ft. 12,000 acres.

Located 7 miles south of Angels Camp on Hwy 49.

Info: Park manager, Jamestown, CA.

Services/Facilities: Primitive camping, launch.

Species: Rainbow and Brown Trout, Largemouth and Smallmouth Black Bass, Catfish, Bluegill, and Crappie.

Pardee Reservoir – Elevation 568 ft. 2,200 acres.

From Hwy 88, 2 miles south of Ione, use Buena Vista Rd. to Stony Creek Rd. North on Stony Creek Rd to Pardee Dam Rd. Approximately 7 miles to lake from Hwy 88.

Info: Pardee Lake Resort, Ione, CA.

Services/Facilities: Tent and RV sites with full hookups, full service marina, launch ramp, rentals, dining, grocery store, disposal, gas and propane.

Species: Rainbow and Brown Trout, Kokanee, Largemouth Bass, Catfish, Bluegill, and Crappie.

Schaads Reservoir – Elevation 2,900 ft. 55 acres.

From Hwy 26, 2 miles south of West Point, use Associated Office Rd, .5 mile to Railroad Flat Rd. Travel south 1 mile to Blue Mountain Rd., then east 3 miles to USFS Rd. 6N03 at “Lodestar” sign, follow signs 1.3 miles to lake and resort.

Management: Calaveras Co. Water District

Info: Department of Fish and Game (SVCSR), Rancho Cordova

Services/Facilities: Wilseyville, 4.5 miles.

Species: Rainbow Trout.

Tulloch Reservoir – Elevation 515 ft. 55 mile shoreline.

Located 7.5 miles south of Hwy 4 near Copperopolis (North shore) via O’Byrnes Rd., and 5 miles north of Hwy 108 (South shore) via Tulloch Rd.

Info: Lake Tulloch Marina, Tulloch Dam Rd.

Services/Facilities: Tent and RV sites, full service marina, launch ramps, rentals, motel, restaurant, store and gas.

Species: Largemouth and Smallmouth Bass, Rainbow Trout, Catfish, Bluegill, and Crappie.

White Pines Lake – Elevation 3,820 ft. 26 acres.

From Arnold on Hwy 4, travel 1 mile on Blagen Rd to the lake.

Info: Arnold Chamber of Commerce.

Services/Facilities: Arnold 1 mile. Picnic tables, drinking fountains, fire pits, swimming.

Species: Rainbow Trout, Catfish, and Bluegill.

Rivers and Streams

Angels Creek – Elevation 1,380 – 2,200 ft. 4 mile reach.

Access from (1) Hwy's 4 and 49 bridges at Angels Camp and (2) at park in Murphy's on Hwy 4.

Info: Angels Camp and Murphy's Chamber of Commerce.

Services/Facilities: Angels Camp, Altaville, and Murphy's.

Murphy's Park has barrier-free restrooms and fishing access with assistance, picnic tables, and barbeques.

Species: Rainbow Trout.

Mokelumne River (South Fork and Middle Fork)

Check local access. Not stocked.

COLUSA COUNTY

Lakes and Reservoirs

East Park Reservoir - Elevation 1,200 ft. 1818 acres.

From Maxwell on Interstate 5, travel 24 miles west on Maxwell Sites Rd. to park entrance.

Info: Stonyford Ranger District, Stonyford.

Services/Facilities - Primitive camping, unimproved boat ramp, picnic area.

Species: Largemouth Bass, Bluegill, Crappie, and Catfish.

Rivers and Streams

Sacramento River See Regional Rivers section.

ELDORADO COUNTY

Lakes and Reservoirs

Crystal Lakes Basin Recreation Area

Accessible via Ice House Rd. off Hwy 50, 9 miles east of Pollock Pines. 10.5 miles to:

Ice House Reservoir – Elevation 5,500 ft. 678 acres

Union Valley Reservoir – Elevation 4,900 ft. 2,860 acres. 7 miles from Ice House Reservoir.

Loon Lake – Elevation 6,500 ft. 800 acres. 12 miles beyond Union Valley Reservoir.

Gerle Creek Reservoir – elevation 6,500 ft. 50 acres.

Info: USFS, Pollock Pines OR Placerville, CA.

Services/Facilities: Tent and RV sites, launch ramps. No motors at Gerle Creek. Full facilities at Ice House Reservoir. Barrier-free access.

Species: Rainbow Trout, Lake Trout, Brown Trout, Kokanee, and Smallmouth Bass at Union Valley Reservoir.

Echo Lake (Lower and Upper) – Elevation 7,400ft. 338 acres.

From Hwy 50 near Little Norway, use Echo Drive-Echo Summit Rd, 1.5 miles to lake.

Info: Echo Chalet, Echo Lake.

Services/Facilities: Cabins, food, store, bait and tackle, gas, launch ramp, rentals, barrier-free fishing, restrooms.

Species: Rainbow, Brown, and Brook Trout, Cutthroat and Kokanee.

El Dorado Forebay – Elevation 4,000 ft. 23 acres

Take Sly Park exit from Hwy 50 at Pollock Pines to Pony Express Trail, then to Forebay Rd. No boats.

Info: El Dorado Irrigation District, Placerville, CA.

Services/Facilities: Pollock Pines, .7 miles.

Species: Rainbow Trout.

Fallen Leaf Lake – Elevation 6,300 ft. 600 acres.

Access via Fallen Leaf Rd., off Hwy 89, 4 miles north of junction with Hwy 50 near South shore Lake Tahoe.

Info: USFS Lake Tahoe Basin Management Unit, Lake Tahoe, CA.

Services/Facilities: Tent and RV campsites, lodge, launch ramp, rentals, store, bait and tackle, showers, Laundromat.

Species: Rainbow, Brown, and Mackinaw Trout.

Jenkinson Lake (Sly Park Reservoir) – Elevation 3,500 ft. 640 acres.

From Hwy 50 at Pollock Pines, take Sly Park exit, 4 miles south to lake.

Info: El Dorado Irrigation District, Placerville, CA.

Services/Facilities: Marina, RV and tent campsites, barrier-free campsites, bathhouse.

Species: Rainbow, Brown, and Mackinaw Trout, Bass, and Bluegill.

Kirkwood Lake – Elevation 7,600 ft. 68 acres.

From Kirkwood on Hwy 88, follow road 1 mile to campsites and lake. No motors.

Info: Ranger Station, Pioneer, CA.

Services/Facilities: Tent and RV campsites, launch ramp, resort at Caples Lake (3 miles).

Species: Rainbow Trout, Smallmouth Bass.

Sawmill Pond – Elevation 6,250 ft. 200 acres.

From Hwy's 50 and 89 junction, travel south on Lake Tahoe Blvd. 2.5 miles. Reserved fishing for ages 14 and younger.

Info: El Dorado County Fish and Game Commission.

Services/Facilities: South Lake Tahoe. Restrooms.

Species: Rainbow Trout.

Stumpy Meadows Lake – Elevation 4,200 ft. 325 acres.

Use Georgetown – Wentworth Springs Rd., travel 18.5 miles from Georgetown to lake.

Info: Georgetown Ranger District, Georgetown, CA.

Services/Facilities: Tent and RV campsites, web barrier-free high water access, restrooms, and launch ramp.

Species: Rainbow and Brown Trout.

Wrights Lake – Elevation 7,000 ft. 65 acres.

Access via Wrights Lake Rd., 5 miles east of Kyburz off Hwy 50. No motors.

Info: USFS Pacific Ranger District, Pollock Pines, CA.

Services/Facilities: Tent and RV campsites, hand launch.

Species: Rainbow and Brown Trout.

Rivers and Streams

American River, Silver Fork – Elevation 4,500 ft. 3 mile reach.

Take Silver Fork Rd., 1.5 miles south of Kyburz on Hwy 50 to China Flat Campground.

Info: USFS Pacific Ranger District, Pollock Pines, CA.

Services/Facilities: RV sites, primitive tent campsites, barrier-free campsites at Silver Fork Campground.

Species: Rainbow and Brown Trout.

American River, South Fork (Coloma) – Elevation 750 ft. .5 mile reach.

From Placerville at junction of Hwy's 50 and 49, take Hwy 49 north 11 miles to Coloma. Best access at Marshall Gold Discovery State Park.

Info: CA State Parks and Recreation, Coloma, CA.
