

Electronic reporting system launched in 2016

- Web-based, password-protected system
- Not a real-time notification or case investigation system
- Event-based, not for routine water monitoring

For local, state, and territorial public health partners to voluntarily report to the Centers for Disease Control and Prevention (CDC)

Data on food- or waterborne HAB events: fresh and marine water

- HAB events (environmental data)
- HAB-associated human cases of illness
- HAB-associated animal cases of illness

- ❑ Trainings in July and August will soon be scheduled by CDC

- ❑ Information needed on:
 - methods for inputting CA data into this system
 - data sharing from CDC to local jurisdictions

- ❑ *CCHAB will have more information available at our September 2016 meeting.*

Became available nationwide: 6-22-2016
