

SWAMP Inland Beaches Workgroup Meeting Agenda
February 9, 2016 9:30AM-11AM

Attendees:

1) Safe to Swim Portal

- a) Data interpretation: using 100 *E. coli* as an objective? Displaying both fecal coliform and *E. coli* data? Using data points or a trend line?
- b) Development of a “test version”?
- c) Connecting the portal with other agencies that already post data for inland beaches (i.e. East Bay Regional Park)
- d) Any additional information we want available on the “safe-to-swim portal? (i.e fact sheet on how the number was created for the protection of beneficial use)

2) Incentives to get data into CEDEN

- a) Connect with Council for Watershed Health, State Parks, State Water Project, etc.?
- b) Table discussion until Safe to Swim portal is active and determine if that is incentive enough?

3) Statewide Monitoring Framework/SOP/Methods

Should we dedicate a webpage that provides a link to freshwater Safe to Swim and provides links to existing guidance documents? Provide all USEPA approved methods links? Also, additional information as to different types of methods (drinking water/recreation), reporting limits, data each method produces, qPCR and IDEX information?

4) Source tracking

Address source tracking that focuses on inland waters? Provide information on a webpage? Next steps, if any?

5) Addressing budget questions by Terry.

6) What to tackle first and how and assign tasks.
