

Water Planning Information Exchange

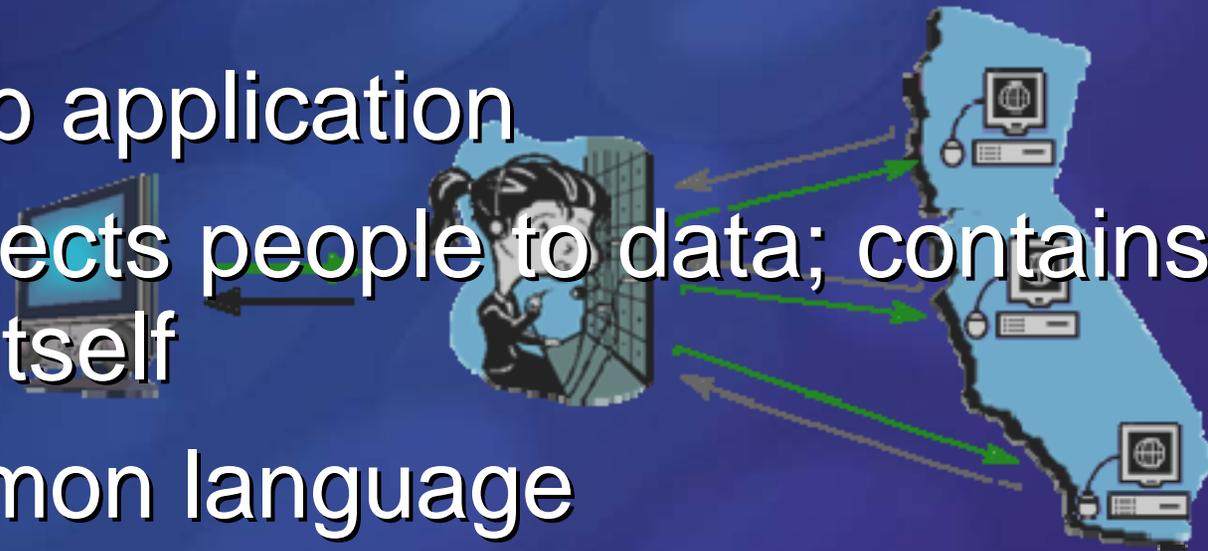

Greg Smith

Statewide Data Program

California Department of Water
Resources

What is the Water Planning Information Exchange?

- ❖ A web application
- ❖ Connects people to data; contains no data itself
- ❖ Common language

Where We Are Today

- ❖ “California lacks a consistent framework and standards for collecting, managing, and providing access to information”
- ❖ “California needs better water management information and analytical tools to produce useful and more integrated information”
- ❖ “Investment in our analytical capabilities lags far behind the growing challenges facing water managers.”

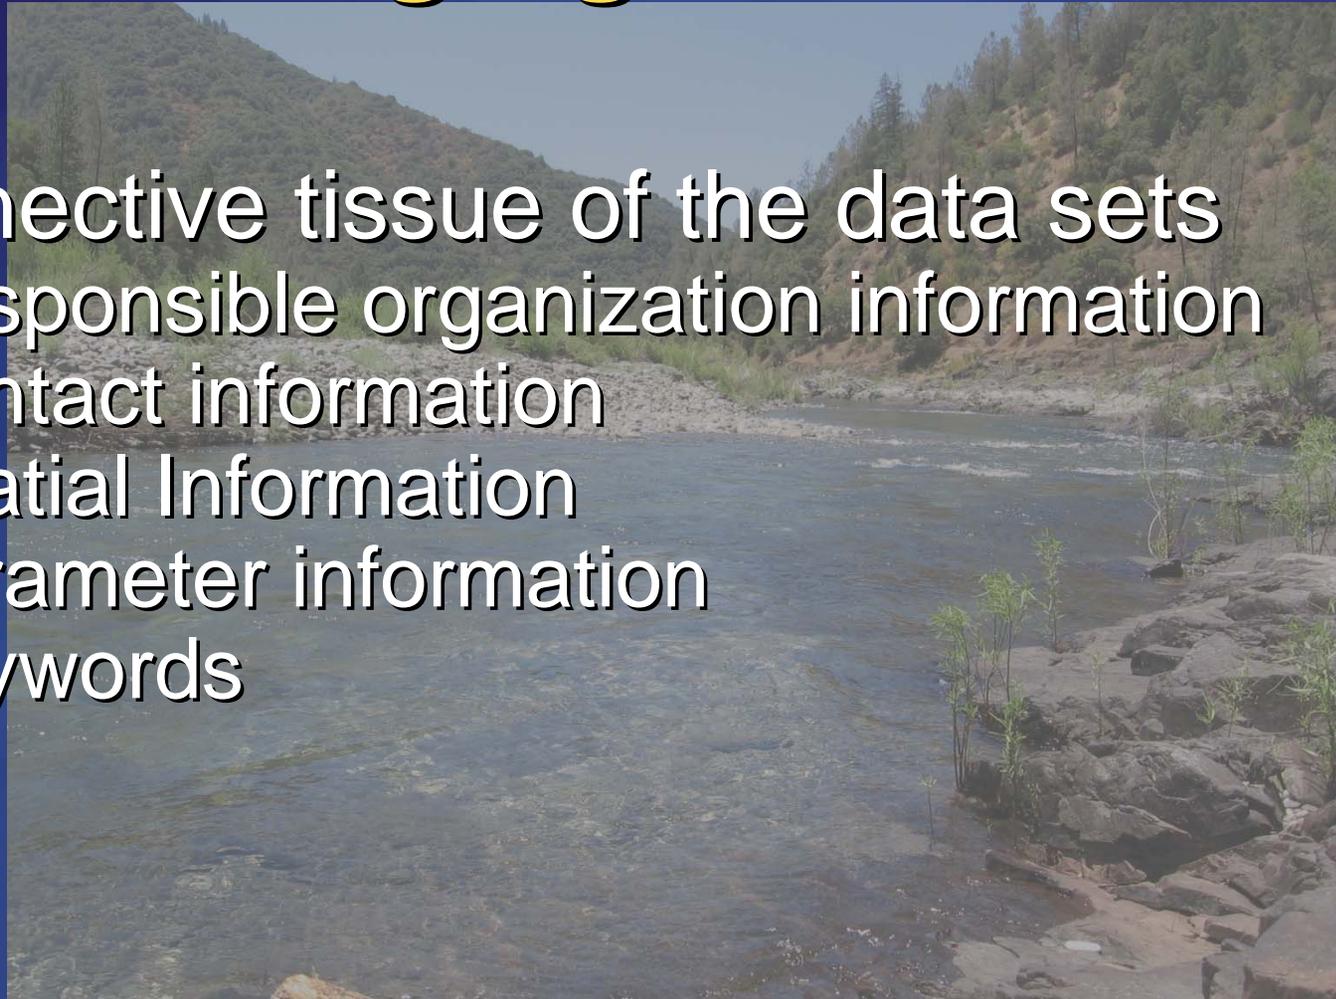

The Data Sets

- ❖ From anywhere
- ❖ Voluntary
- ❖ Locally controlled and managed

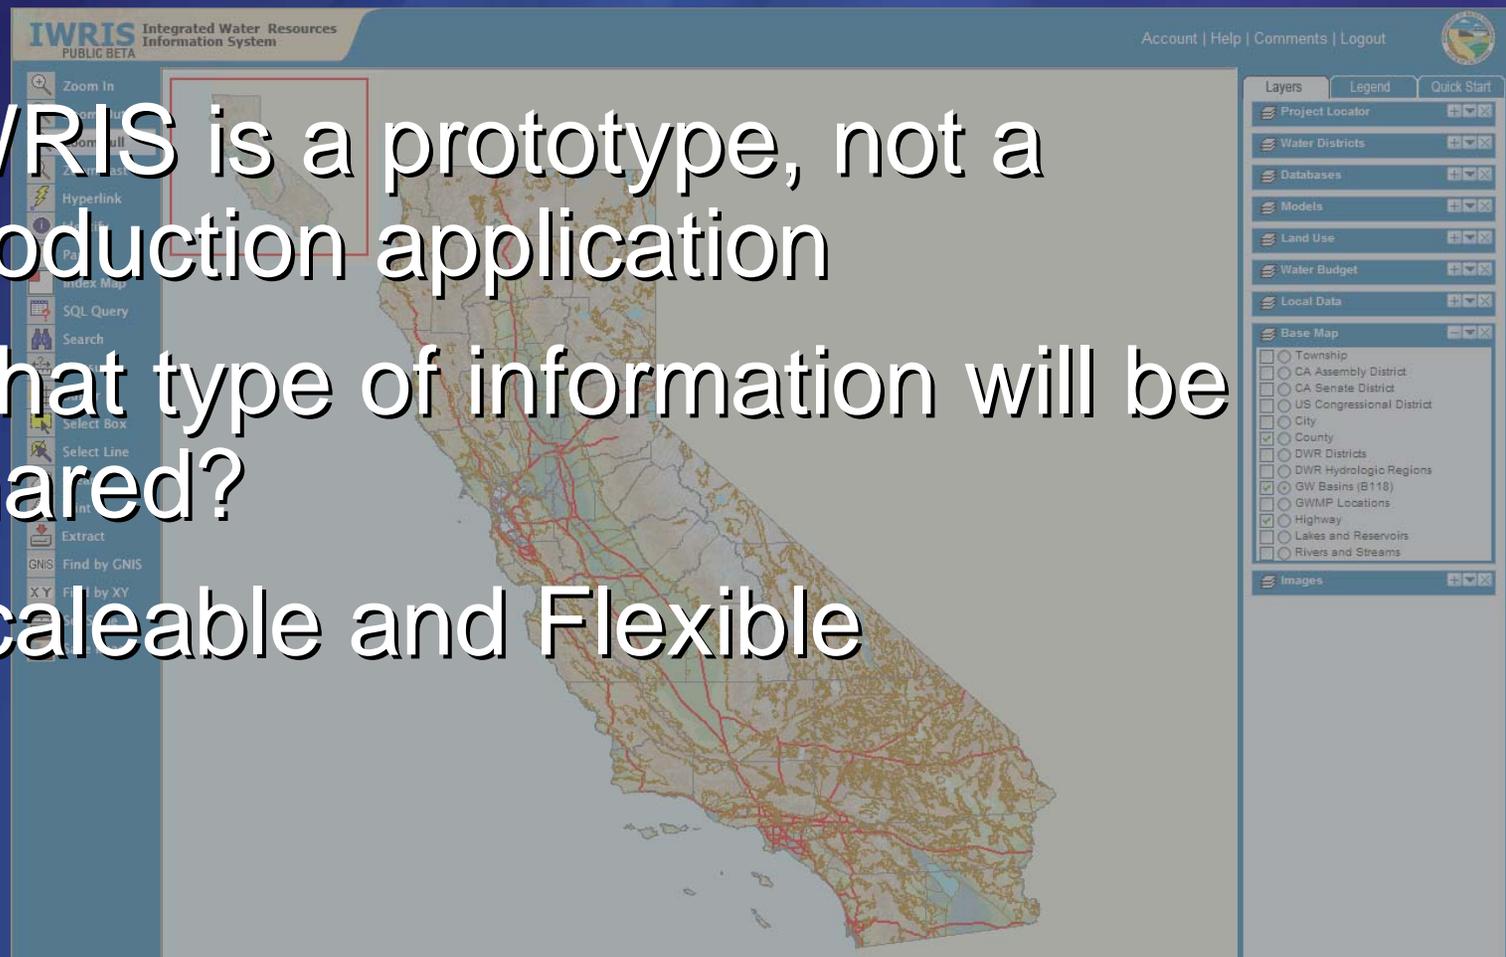

Common Language

- ❖ Connective tissue of the data sets
 - Responsible organization information
 - Contact information
 - Spatial Information
 - Parameter information
 - Keywords

Web Application

- ❖ IWRIS is a prototype, not a production application
- ❖ What type of information will be shared?
- ❖ Scalable and Flexible
