NOTICE IS HEREBY GIVEN that the California Water Quality Monitoring Council will meet to discuss issues relating to its responsibilities pursuant to California Senate Bill 1070 (Statutes of 2006).

BACKGROUND

In November 2007, a [Memorandum of Understanding \(MOU\)](#) was signed by the Secretaries of the California Environmental Protection Agency (Cal/EPA) and the California Natural Resources Agency to establish the California Water Quality Monitoring Council (Monitoring Council). The MOU was mandated by [CA Senate Bill 1070 \(Statutes of 2006\)](#) and requires the boards, departments and offices within Cal/EPA and the Natural Resources Agency to integrate and coordinate their water quality and related ecosystem monitoring, assessment, and reporting.

Monitoring Council members include representatives from Cal/EPA, the Natural Resources Agency, the Department of Public Health, citizen monitoring groups, regulated publicly owned treatment works, stormwater, agriculture and water supply interests, the scientific community, and the public. The Monitoring Council is also required by SB 1070 to consult with the U.S. Environmental Protection Agency, whose representative attends all Monitoring Council meetings.

SB 1070 and the MOU require that the Monitoring Council develop specific recommendations to improve the coordination and cost-effectiveness of water quality and related ecosystem monitoring and assessment, enhance the integration of monitoring data across departments and agencies, and increase public accessibility to monitoring data and assessment information. While the Monitoring Council may recommend new monitoring or management initiatives, it will build on existing efforts to the greatest extent possible.

SB 1070 and the MOU require that the Monitoring Council, in coordination with the State Water Resources Control Board, recommend a “comprehensive monitoring program strategy that utilizes and expands upon the state’s existing statewide, regional, and other monitoring capabilities and describes how the state will develop an integrated monitoring program that will serve all of the state’s water quality monitoring needs and address all of the state’s waters over time.” Those [recommendations](#) were submitted to the Agency Secretaries in December 2010.

MEETING PURPOSE AND DESCRIPTION

The purpose of this meeting is for the Monitoring Council to plan further implementation of their recommended monitoring program strategy and to develop additional recommendations to Cal/EPA and the Natural Resources Agency. Meeting topics will include:

- Public Forum: opportunity to address the Council on items *not* on the agenda
- My Water Quality web update
- Monitoring Council legislative priorities for 2016
- Watershed health as measured by bioassessment, toxicity, and pesticides
