

My Water Quality Website Usage Summary

Welcome to My Water Quality

Is Our Water Safe to Drink?

Safe drinking water depends on a variety of chemical and biological factors regulated by a number of local, state, and federal agencies. [Learn more >>](#)

Are Our Aquatic Ecosystems Healthy?

The health of fish and other aquatic organisms and communities depends on the chemical, physical, and biological quality of the waters in which they live. [Learn more >>](#)

Is it Safe to Swim in Our Waters?

Swimming safety of our waters is linked to the levels of pathogens that have the potential to cause disease. [Learn more >>](#)

Are harmful algal blooms affecting our waters?

Harmful algal blooms can make water unsafe for swimming and other recreational activities. The toxins they produce can harm pets, livestock, and people. [Learn more >>](#)

Is it Safe to Eat Fish From Our Waters?

Aquatic organisms are able to accumulate certain pollutants from the water in which they live, sometimes reaching levels that could harm consumers. [Learn more >>](#)

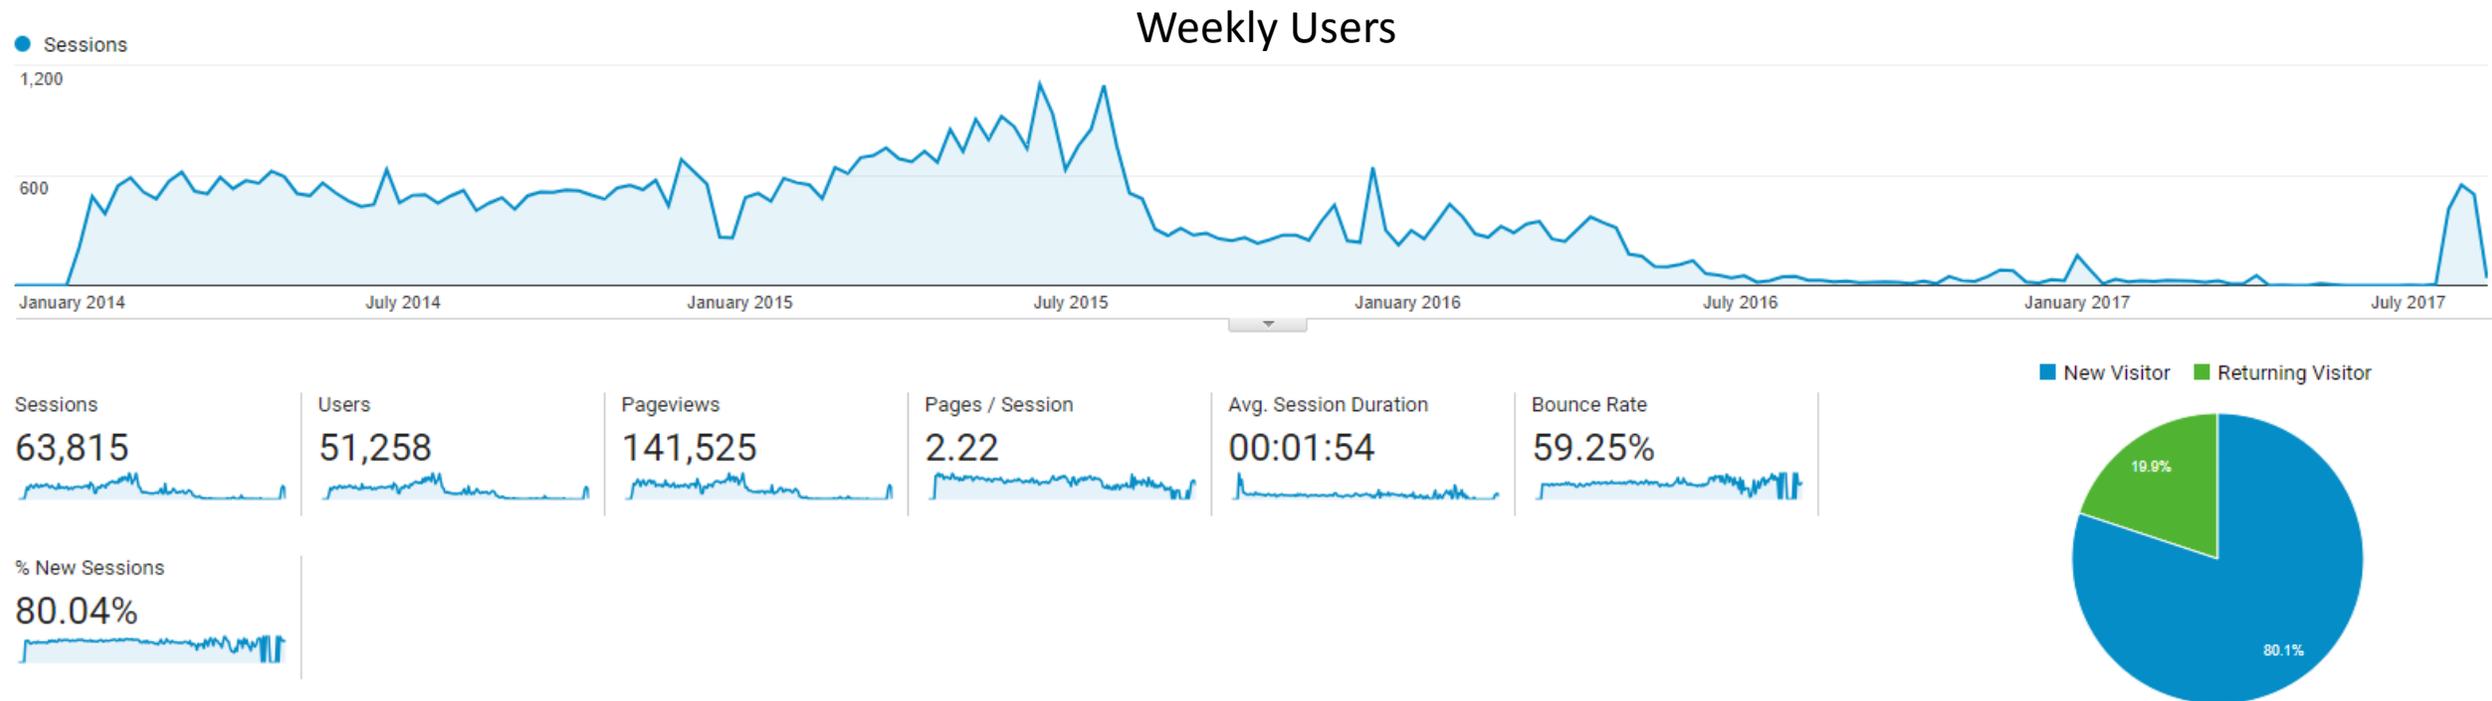

Is There Monitoring Data Near Me?

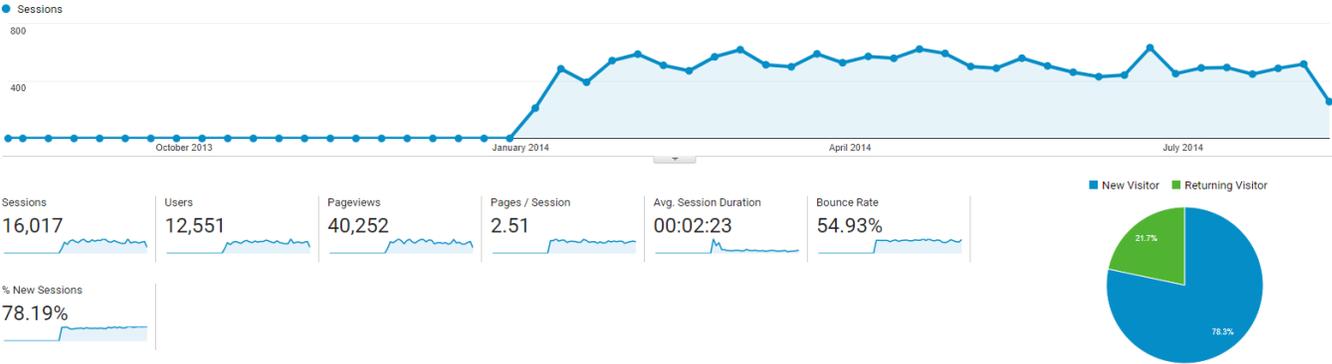

A number of regional monitoring programs throughout California collect and display water quality and aquatic ecosystem health data. [Learn more >>](#)

2014 to Present – Total Usage

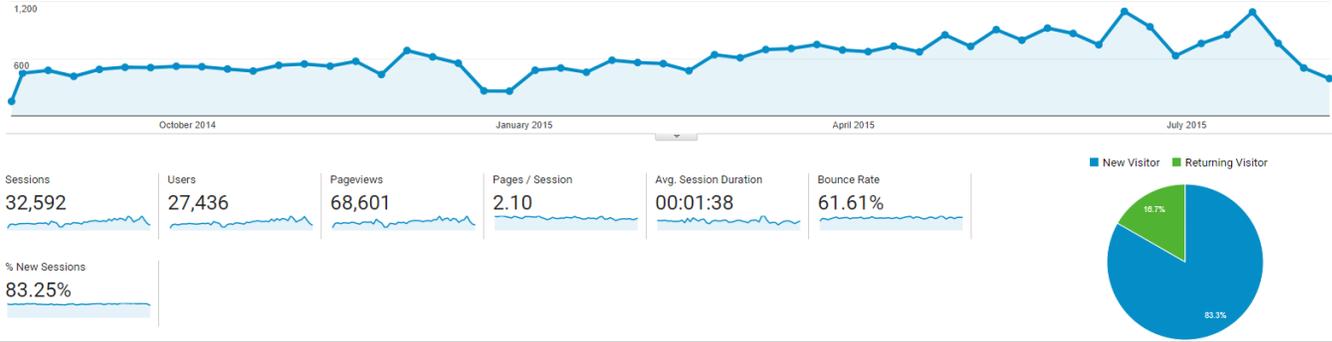

- 80% of site visits from unique users (only one visit to the site)
- 60% of visitors leave without visiting more than the first page they land on
